You arrive at our traditional wooden boat, called a klotok. Our guide will reconfirm with the crew that everything is ready and start the cruise up the river in the famous Sekonyer River aboard a klotok. If your flight arrives early (before 11.30 AM), you can arrive in time to the rehabilitation center of Tanjung Harapan, where at 3 o'clock in the afternoon, the rangers of the national park feed the orangutans, and you can have your first close encounters with them. The translation of Tanjung Harapan is Cape of Hope.

This first camp is one of the ones with more wetlands, and being in the afternoon has more mosquitoes, so make sure you put on enough mosquito repellent. Here you also can do the reforestation, where you can be volunteers to plant a tree, and so take pride that you have contributed a grain of sand to conservation with your step over there. After visiting this Rangers Camp, you will continue upstream, resting on the boat, while you search for animals in the vicinity of the Sekonyer River. This afternoon, it is very frequent to see groups of proboscis monkeys and monkeys in the treetops, jumping from one branch to another, or even crocodiles, and lizards in the shallow waters of the sides of the river. Prepare for sunset. The boat moored on one side of the river to spend the night. Tonight, you can do a walk into the jungle to look for night animals like snakes, tarantulas or if you are lucky luminescent mushrooms or tarsiers.

Day 3 TANJUNG HARAPAN VILLAGE – PROBOSCIS TOUR – CAMP LEAKEY

After an extraordinary breakfast, you go to visit the village inside the national park, named Tanjung Harapan Village. Here you will see the activities of the locals. After the visit, you will return to the klotok cruise up to the Sekonyer River. You will see nice vegetation around the river bank, including Nipa Palm, Pandanus, and some kinds of trees that are growing up around the river. See some wildlives such as birds, Macaques, Proboscis Monkeys and Orangutans. You will see how the coloration of the river changes, and you will have the opportunity to see crocodiles and large monitor lizards.

Arrival at Camp Leakey, the old orangutan research and rehabilitation center since 1971, when a student at UCLA Los Angeles University, Birutte Galdikas began studying the Orangutans there. The

name Camp Leaky comes from Birutte's own teacher, the Paleoanthropologist Louis Leakey. At least 200 orangutans had already been cured and returned to the jungles, thanks to this center. However, since 1995, the Government of Indonesia has banned the introduction of more Orangutans into this camp, so Orangutans are increasingly adapting more to freedom. To this day, this camp is used as an investigation into the behavior and feeding of Orangutans. You will take advantage of your guide to explore the interiors of the jungle a bit to look for orangutans in freedom and other animals. At 14.00, you can see the feeding time of the Orangutans. You can also visit the small museum made by the scientist Dr. Birute Galdikas.

Note: The Birute Galdikas Museum at Camp Leaky is currently closed for maintenance purposes. Regrettably, visits to this site will not be possible until further notice. We apologize for any inconvenience this may cause and will keep you updated on the reopening of the museum.

Sooner or later, you will see how the branches of the treetops begin to move, and then you will see the silhouettes of the Orangutans arriving at the feeding platform. Pondok Tanggui was a release camp for young Orangutans that were rehabilitated, and they continue to add food every day to prevent the Orangutans from leaving because of a lack of food. They end up outside the National Park, with the following risk of falling into traps of settlers or fields of palm oil plantations. After lunch, you will have the opportunity to repeat feeding camp at Camp Leaky. It is a unique opportunity to dedicate more time to

your observation and to discover more wild animals, along with the Orangutans. In the afternoon, if it does not rain, the boat will be docked near a firefly congregation, and you can enjoy the show of its luminescence.
