You arrive at our traditional wooden boat, called a klotok. Our guide will reconfirm with the crew that everything is ready and start the cruise up the river in the famous Sekonyer River aboard a klotok. If your flight arrives early (before 11.30 AM), you can arrive in time to the rehabilitation center of Tanjung Harapan, where at 3 o'clock in the afternoon, the rangers of the national park feed the orangutans, and you can have your first close

encounters with them. The translation of Tanjung Harapan is Cape of Hope. This first camp is one of the ones with more wetlands, and being in the afternoon has more mosquitoes, so make sure you put on enough mosquito repellent. Here you also can do the reforestation, where you can be volunteers to plant a tree, and so take pride that you have contributed a grain of sand to conservation with your step over there. After visiting this Rangers Camp, you will continue upstream, resting on the boat, while you search for animals in the vicinity of the Sekonyer River. This afternoon, it is very frequent to see groups of proboscis monkeys and monkeys in the treetops, jumping from one branch to another, or even crocodiles, and lizards in the shallow waters of the sides of the river. Prepare for sunset. The boat moored on one side of the river to spend the night. Tonight, you can do a walk into the jungle to look for night animals like snakes, tarantulas or if you are lucky luminescent mushrooms or tarsiers.

Day 3 Tanjung Harapan Village – Proboscis Tour – Camp Leakey

After an extraordinary breakfast, you go to visit the village inside the national park, named Tanjung Harapan Village. Here you will see the activities of the locals. After the visit, you will return to the klotok cruise up to the Seikonyer River. You will see nice vegetation around the river bank, including Nipa Palm, Pandanus, and some kinds of trees that are growing up around the river. See some wildlifes such as birds, Macaques, Proboscis Monkeys and Orangutans. You will see how the coloration of the river changes, and you will have the opportunity to see crocodiles and large monitor lizards.

Arrival at Camp Leakey, the old orangutan research and rehabilitation center since 1971, when a student at UCLA Los Angeles University, Birutte Galdikas began studying the Orangutans there. The name Camp Leaky comes from Birutte's own teacher, the Paleoanthropologist Louis Leakey. At least 200 orangutans had already been cured and returned to the jungles, thanks to this center. However, since 1995, the Government of Indonesia has banned the introduction of more Orangutans into this camp, so Orangutans are increasingly adapting more to freedom. To this day, this camp is used as an investigation into the behavior and feeding of Orangutans. You will take advantage of your guide to explore the interiors of the jungle a bit to look for orangutans in freedom and other animals. At 14.00, you can see the feeding time of the Orangutans. You can also visit the small museum made by the scientist Dr. Birute Galdikas.

Pondok Tanggui was a release camp for young Orangutans that were rehabilitated, and they continue to add food every day to prevent the Orangutans from leaving because of a lack of food. They end up outside the National Park, with the following risk of falling into traps of settlers or fields of palm oil plantations. After lunch, you will have the opportunity to repeat feeding camp at Camp Leakey. It is a unique opportunity to dedicate more time to

your observation and to discover more wild animals, along with the Orangutans. In the afternoon, if it does not rain, the boat will be docked near a firefly congregation, and you can enjoy the show of its luminescence.

Luggage

Please bring a small rucksack to use as a day bag. You can bring this as hand luggage on the airplane. You will carry your lunch, water, spare layers and any personal medication with you each day in this bag. You will also need a larger bag to store your other clothes and belongings in, please ensure that this is a soft bag like a rucksack or holdall rather than a hard cased suitcase because it is more practical. We recommend packing all of your clothes in plastic bags so that they stay dry in the event of wet weather.

Medicine

Your guide/driver is a trained first-aider and will carry a full first aid kit at all times during the trip. We recommend that you bring a small personal first aid kit containing any medication you may need such as inhalers, plasters, antiseptic and painkillers.

Weather

Indonesia is positioned on both sides of the equator making it subject to a similar climate year round. As a rule the South is generally drier and less hot. The average temperature ranges between 24°C and 35°C (75°F and 95°F). We cannot guarantee no rain but we can suggest that the best season to visit Indonesia is the dry season, from mid-April to October/November.

Electricity

Indonesia uses European-style plugs with two round pins. Voltage is normally 220 V 50 Hz except in a few places where it is 110 V.

Local time

Indonesia is spread across three time zones. The Lesser Sunda Islands use Coordinated Universal Time (UTC)/ Greenwich Mean Time (GMT) +8. Indonesia does not use Daylight Saving Time (DST).

The Leave No Trace policy can be summarized in 7 simple steps which we hope you will follow during our trip...

1. Be prepared
2. Stick to trails and camp overnight right
3. Stash your trash and pick up waste
4. Leave it as you find it
5. Be careful with fire

6. Respect wildlife

7. Be considerate of other visitors

Over the years we have built up good relations with our local suppliers and we are keen to support local businesses as much as possible. We are a small company and we pay our local partners and suppliers directly insuring fair rates.
